

Switching on the appliance

- Plug in the electric connecting plug.
- Turn the appliance on by pressing the POWER ON (5) button.
 - The POWER ON LED will light up and signal that the appliance is ready for operation.
 - The display shows the ACTUAL temperature.
- Press the SET button (3) to display the SET temperature.
- To change the target temperature, keep the SET button pressed and use buttons (1) and (2) to edit the value.
 - The adjusted value is saved automatically.
- Start operation by pressing the START (4) button.
- Allow moisture to escape, as required, using the steam valve (7).

Switching the unit off

- Turn the appliance off by pressing the POWER ON (5) button.
 - Empty display, no LED will light up. The appliance is off.
- Unplug mains connector. Put the mains connector in the connector retainer (6), if available.

8 Cleaning, maintenance and care

This chapter provides information about complying with hygiene regulations. Read the chapter on 'General safety information' carefully in advance.

8.1 Safety information about cleaning, maintenance and care

⚠ Avoid dangers due to electricity
